

Ideal customer profile — Librebase

Candidate profiles

Independent SaaS Architect / Migration Specialist

Consultants who build custom databases and migration paths for SMEs, helping clients escape vendor lock-in without large upfront infrastructure costs.

Developer Relations Lead

Engineers responsible for integrating LLM agents and MCP protocols, ensuring their platform can handle high throughput with minimal operational overhead.

Security

Experts who design compliance frameworks for cloud-native applications needing strict data sovereignty and reduced attack surface.

Compliance Consultant for Cloud Providers

Experts who design compliance frameworks for cloud-native applications needing strict data sovereignty and reduced attack surface.

Independent Database Consultant for SMEs

Solo engineers or small agency owners managing databases for diverse clients who need lightweight, high-performance storage without vendor lock-in.

AI Agent Builder

Developers building autonomous agents on top of LLMs who require persistent state management with high reliability and security by default.

Developer

Developers building autonomous agents on top of LLMs who require persistent state management with high reliability and security by default.
